Hisaab Bolo

Merchant Growth AI

- Problem statement

Merchant Growth AI that turns every Paytm payment into clear insight, voice answers and on-time collections.

Team PiedPiper

“Ram ne pichhle 4 mahine mein kitna diya?”

01 · PROBLEM STATEMENT

Merchants get paid every day, but they can't make sense of the money.

01

Data, no insight

A passbook of thousands of ₹ entries. No trends or peak hours, and no sense of what's growing or slipping.

02

Customers are invisible

Ram pays ₹100 every morning, but the merchant can't see who the regulars are, or when one quietly stops.

03

Collections run on memory

Invoices go out, then follow-ups happen over calls and WhatsApp. Dues slip through and cash flow suffers.

60M+

UPI-accepting merchants in India[1]

~240B

UPI transactions projected for FY26[2]

[1] Business Standard, Mar 2025 · [2] Storyboard18, Mar 2026

Your payments, explained. Just ask.

Hisaab Bolo sits on top of a merchant's Paytm payments and turns them into four things they'll actually use.

- **Insights dashboard**
  Daily totals, trends, peak hours and slow days at a glance.
- **Customer ledger**
  Every payer's habits and history, searchable by name.
- **Voice Hisaab**
  Ask in Hindi, English or Hinglish and hear the answer spoken back.
- **Smart collections**
  Track unpaid invoices and send reminders with a link and QR.

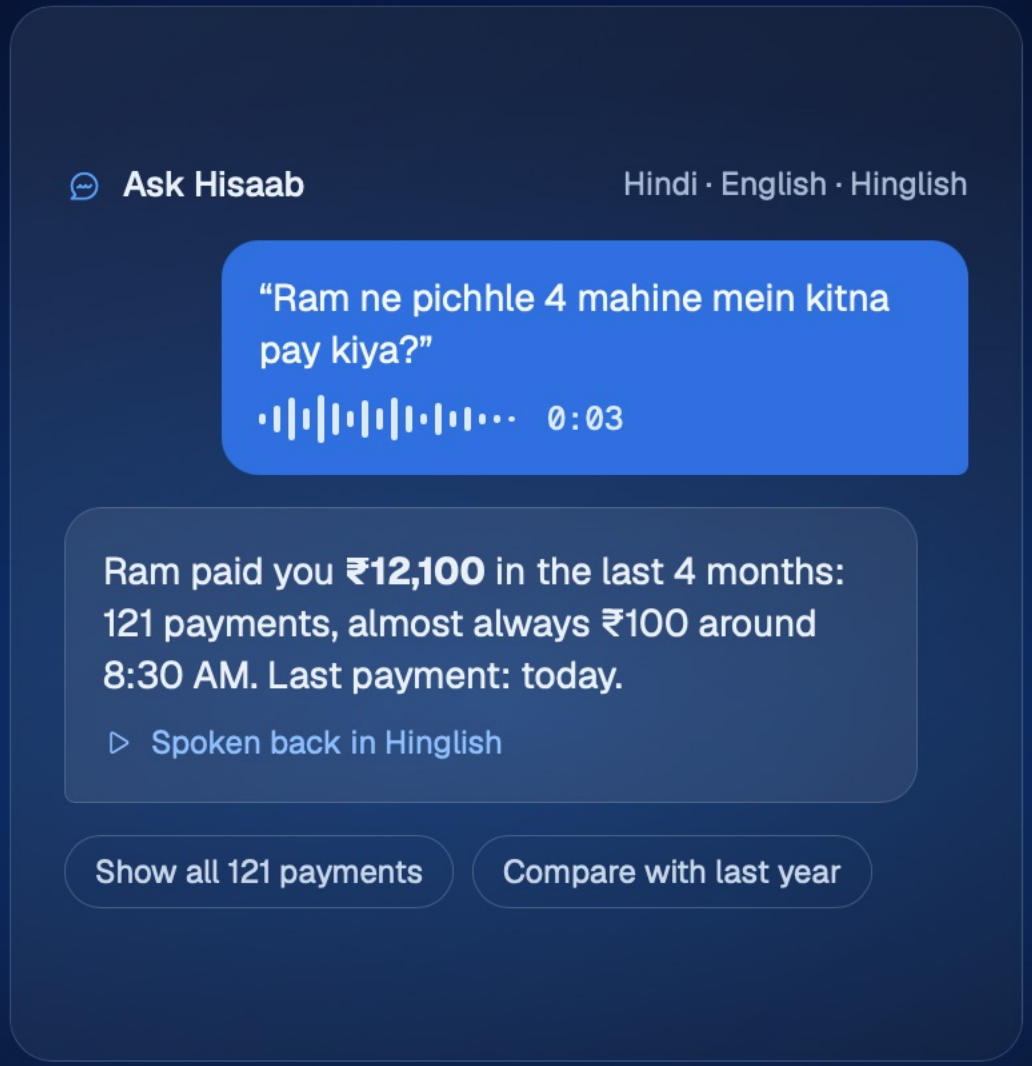

SOLUTION · INSIGHTS

Every rupee, sorted by day and by person.

- Daily, weekly and monthly totals with trends and peak hours.
- A profile for every payer, built from their UPI ID with no data entry.
- Search “Ram” to see ₹100 every morning, 121 payments since June.

Mock-up · illustrative data

SOLUTION · VOICE HISAAB

Ask your hisaab the way you’d ask your munim.

01 **Speak**
Hindi, English or Hinglish, hands-free in the app.

02 **Understand**
AI picks out who (Ram), what (total paid) and when (last 4 months).

03 **Query**
A safe, read-only query runs on this merchant’s own ledger only.

04 **Answer**
It speaks the number back and shows the payments behind it.

Mock-up · illustrative data

SOLUTION · SMART COLLECTIONS

Unpaid invoices chase themselves.

Pending payments

₹11,700 outstanding · 2 customers

Customer	Amount	Status
Sharma Traders	₹8,500	Overdue · 9 days
Priya Caterers	₹3,200	Due tomorrow
Ram	₹1,500	Paid · auto-matched

Send 2 reminders Email now, WhatsApp next

To: accounts@sharmatraders.in

Reminder: ₹8,500 due to Gupta Kirana Store

Hi Sharma ji, invoice #INV-0412 from 12 Oct is still pending. Pay in one tap or scan:

Pay ₹8,500 with Paytm

or scan with any UPI app

Invoice sent → Tracked as due → Reminder: email, link and QR → Paid and auto-matched

Mock-up · illustrative data

Built on top of Paytm's merchant stack.

01

Ingest

- Paytm PG & UPI transaction webhooks
- Invoices, payment links, settlements
- FastAPI services and a job queue

02

Store & resolve

- PostgreSQL + TimescaleDB for time-series
- Payer identity from UPI ID + fuzzy name match
- Redis cache for instant dashboards

03

Intelligence

- Indic speech-to-text and voice replies
- LLM agent: read-only text-to-SQL, scoped to one merchant
- Trend forecasts and drop-off alerts

04

Act & show

- Next.js dashboard, React Native app
- Paytm Payment Links + Dynamic QR
- Reminder emails via Amazon SES

`Python · FastAPI · PostgreSQL · TimescaleDB · Redis · LangGraph · Sarvam AI · Next.js · AWS`

04 · USP

It listens, remembers and collects, all in one place.

Capability	Payment app history	Manual ledger apps	Hisaab Bolo
Payments captured automatically	Yes	No, typed in	Yes
Per-customer patterns and search	No	Manual	Yes, from UPI ID
Ask by voice in Hindi or Hinglish	No	No	Yes
Reminder with payment link and QR	No	Yes	Yes, scheduled
Marks paid and reconciles itself	No	Manual	Yes
Alerts on slow days and lost regulars	No	No	Yes

- Voice-first, in Bharat's languages
- Zero data entry, built on Paytm data
- From insight to action in one tap

Comparison shows typical features; individual apps vary.

05 · IMPACT & BENEFITS

More money in, less time chasing it.

FOR MERCHANTS

Faster collections
One-tap link and QR shorten the wait on unpaid invoices.

Know your regulars
See top customers, and notice when one stops coming.

Hours back every week
No passbook scrolling or spreadsheets. Just ask.

Built for every merchant
Voice in their own language lowers the tech barrier.

FOR PAYTM

Daily engagement
A reason to open Paytm for Business every day.

More payment volume
Every reminder carries a Paytm payment link or QR.

Better lending signals
Clean cash-flow data, with consent, for merchant loans.

Stickier merchants
Insight they can't get elsewhere raises switching costs.

What we'll measure: days to collect · reminder-to-paid rate · voice questions per merchant · 90-day retention

06 · BUSINESS MODEL

Free to start, priced by how much you ask.

LITE · GET STARTED

₹0 / month

Free forever

- ✓ Dashboard and trends
- ✓ Customer search and profiles
- ✓ 20 voice questions a month
- ✓ 10 reminder emails a month

GROWTH · MOST SHOPS

₹299 / month

₹2,999 a year · 2 months free

- ✓ 120 voice questions a month
- ✓ Unlimited email reminders
- ✓ Link + QR, auto-matching
- ✓ Weekly insights, GST exports

PRO · BUSY COUNTERS

₹799 / month

₹7,999 a year · 2 months free

- ✓ 400 voice questions a month
- ✓ WhatsApp reminders, at cost
- ✓ Lost-customer alerts
- ✓ 3 staff logins, Soundbox voice

+ Chains
From ₹2,499/mo: multi-store, API

+ Voice top-up
₹99 for 100 more questions

+ For Paytm
Link volume and lending leads

Proposed pricing, to be validated in a pilot · prices excl. GST

06 · UNIT ECONOMICS

One voice question costs us about 60 paise.

Cost per voice question

Step	Cost
Speech-to-text: Sarvam, ~6 sec at ₹30/hour	₹0.05
LLM: 80% Claude Haiku 5.5, 20% Sonnet 5.5, cached	₹0.25
Voice reply: Sarvam Bulbul, ~100 characters	₹0.15–0.30
Total per question	≈ ₹0.60

Dashboards, search and emails are near-free: reminder emails cost about ₹0.01 each. We budget ₹1 per question to cover retries.

Margin per merchant, per month

Plan	Price	Cost*	Margin
Lite	₹0	~₹27	Acquisition
Growth	₹299	~₹102	~66%
Pro	₹799	~₹280	~65%

Merchants already pay ₹125–150 a month to rent a Soundbox[1] and ~₹3,400 a year for billing software[2]. Growth sits right in that range.

*Full voice cap used + ~₹30 infra (est.) · Sarvam, Anthropic list prices, Oct 2026, ₹88/$ · [1] BofA, 2023 · [2] Capterra
